About This Content

The Original Soundtrack of Remothered: Tormented Fathers is composed by **Nobuko Toda** (Final Fantasy, Halo, Metal Gear Solid) and **Luca Balboni** (who wrote the music for feature films such as Mine and Watch Them Fall).

The soundtrack features all the tunes included in Remothered: Tormented Fathers. More than a hour of music that will drag you back to Richard Felton's house and will make you relive the spooky atmosphere of the game.

remothered tormented fathers - original soundtrack

This game I played for long time. I enjoy at first, very bad, but funny good way. Soon, I get to room. Very big, hurt my computer so frames so bad. While frames bad I need secret key passage to find 3 of them. I look all over room with bad frames but keys hard to find with shaking. I find 2, **BIG SUCCESS**. But other key, where to find do I? I do not find. I give up. Cry tears, many. Mom asks why I cry, I say this game. We both cry. I miss dad.. Decent platformer with good controls.... Oh My Goty !!!

. Just wanted to say thank you for adding a paid DLC. Now I can finally tether this awesome game. :D. Another match 2 game that should have been a DLC to the original game, a **FREE DLC** that is. How can you justify charging money each time you just change the Googled stock images for the cards?. I have beat the whole game twice, and have found it to be very fun. Although it is short, it does take a lot of skill to get past each of the twelve levels. My only complaint is that sometimes the controls are not responsive. Overall, Jailbreak is probably my favorite puzzle game.

This game is truly awesome,

It polished gem that everyone has missed out and that was hidden in the propagande of the Total war series. It's well worth 20 euro even though it now is on sale for just 2 euro. It has high quality graphics and feels very immersive.

Combat seems more realistic in pace than the total war series and it has a very interesting campaign. I haven't played so much but this game does not deserve all that bad critique it has gotten. I don't understand those at all.. Nice :) ..a classic battleships game that you may have enjoyed playing as a kid with pen and paper. Nice to see this concept adopted for pc users. Thank you devs!. Don't buy this game unless you already know you will like it from the description. If you're not sure, you probably won't like it. BUT! If you are a fan of math and oldest-school roguelikes, and you have a few dollars to spare, I highly recommend Hydra Slayer as well as its companion, HyperRogue. It's worth noting that the game is free (minus a little content) from the author's website so buying it here is more a way to show your support.

This is a game about optimizing numbers. There's very little room for mistakes. It will bring you back to old games like NetHack and Angband; not nearly so complex, but equally hard and rewarding.. Kind of wished the graphics were bit more.. detailed? XD I love a good bloody scene but it's lacking the most important basics; the guts. I know this game is focused mainly on dealing a ton of damage and all, but it feels more like a strategy type of game. You gotta place your mines slightly to the right, below the box. So your dude gets stuck and launched over to the left. Just a simple example.

And I see we can unlock hats (TF2 anyone? :B) and skins, but what about voices too? I'm only 4 hours in, with over 8,900 damage points so far. And nothing gets me giggling more than my dude getting blown up to bits in a chipmunk voice.

And since I caught the string of words in my head, I'll mention it now; I'm not in it for the mindless violence, which this game has sadly. I'll go on a search for something like mods or DLCs, whatever it'll get to spice up this game. If there is none, well I can't recommend it really. A game like this, honestly can't last long with anyone.. On surface level the concept seems very interesting. For once, instead of killing monsters and shooting people, you get to grow a flower and spread new life! With multiple different flowers and an upgrade system you're bound to have many hours of fun here, right?

Well, sadly no. There doesn't seem to be any way to really strategize the growing of your flowers, since there's actually only one right way to grow all the flowers, which there are four visually different ones, but which play identically. Reach for the Sun really feels like a simple flash game made as a proof-of-concept or something similar. Play time is somewhere under an hour after which you have gained everything and done everything.

A shame really. With extended gameplay and more interesting mechanics the game could potentially be a unique little flower, but currently it is just over-priced run-of-the-mill flash game you could find on any website.
